Maybe even better than free.

Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. filehosting provides an easy possibility for you to send large files to your friends. Alternatively you can choose to share your download links on blogs, forums and social networking sites. We have no file size limit. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. Just upload the file you want to share with your friends and we send you a download link to your file. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Simply upload your file and share the link. You decide who you want to share your files with. Our service is completely free for everyone. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device.
